THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN, B. SILLIMAN, JR.,

AND

JAMES D. DANA,

IN CONNECTION WITH

PROF. ASA GRAY, OF CAMBRIDGE,
PROF. LOUIS AGASSIZ, OF CAMBRIDGE,
DR. WOLCOTT GIBBS, OF CAMBRIDGE,
PROF. S. W. JOHNSON, OF NEW HAVEN,
PROF. GEO. J. BRUSH, OF NEW HAVEN.

SECOND SERIES.

VOL. XXXVI.—NOVEMBER, 1863.

NEW HAVEN: EDITORS.
1863.

PRINTED BY E. HAYES, 426 CHAPEL ST.

CONTENTS OF VOLUME XXXVI.

NUMBER CVI.

Page.

ART I. On Cephalization, and On Megasthenes and Microsthenes, in Classification (being in continuation of an article on the Higher Subdivisions in the Classification of Mammals); by JAMES D. DANA, - - - - - - - - - - 1

II. Observations upon some of the Brachiopods, with reference to the genera Cryptonella, Centronella, Meristella, and allied forms; by JAMES HALL, - - - - - - - - 11

III. Hydraulics of the Report on the Mississippi River of Humphreys and Abbot; by Prof. F. A. P. BARNARD, LL.D., - 16

IV. Observations on some of the Double Stars; by MARIA MITCHELL, 38

V. On the Flora of the Devonian Period in Northeastern America; by J. W. DAWSON, LL.D., F.R.S., etc., - - - 41

VI. Action of Bromine and of Bromhydric Acid on the Acetate of Ethyl; by J. M. CRAFTS, - - - - - - - 42

VII. New Facts and Conclusions respecting the Fossil Footmarks of the Connecticut Valley; by EDWARD HITCHCOCK, - 46

VII. On Hydrastine; by F. MAHLA, Ph.D., - - - - - 57

IX. Description of a Photometer; by Prof. O. N. ROOD, - - 60

X. On Aerolitics, and the fall of Stones at Butsura, India, May, 1861; by N. S. MASKELYNE, - - - - - - - 64

XI. The Sun and Stars photometrically compared; by ALVAN CLARK, - - - - - - - - - - - - 76

XII. On Glucinum and its Compounds; by Prof. CHARLES A. JOY, 83

XIII. Remarks on the Luminosity of Meteors as affected by Latent Heat; by BENJAMIN V. MARSH, - - - - - 92

XIV. Proceedings of Learned Societies:—1. On Radiation through the Earth's Atmosphere; by JOHN TYNDALL, 99.—2. On the Photographic Transparency of various Bodies, and on the Photographic Effects of Metallic and other Spectra obtained by means of the Electric Spark; by Prof.

W. ALLEN MILLER, 103.—3. On the Long Spectrum of Electric Light; by Prof. GEORGE G. STOKES, 108.—On the Reflexion of Polarized Light on Polished Surfaces; by the Rev. SAMUEL HAUGHTON, 109.

SCIENTIFIC INTELLIGENCE.

Physics.—Gemsbart Electroscope, KOBELL, 111.—Conductibility and specific heat of Thallium, DE LA RIVE, 113.

Chemistry.—On the tungstates, fluo-tungstates and silico-tungstates, MARIGNAC, 113.—On the preparation and properties of metallic rubidium, BUNSEN: On the preparation and properties of metallic magnesium, H. SAINTE-CLAIRE DEVILLE and H. CARON, 114.—On the chemical constitution of the American rock oil, SCHORLEMMER; On some new organic compounds of silicon, FRIEDEL and CRAFTS, 115.—On the coloration of flame by phosphorus and its compounds, CHRISTOFLE and BEILSTEIN, 116.

Analytical Chemistry.—On estimation of nitric acid by conversion into ammonia, 116.

Mineralogy and Geology.—Annual Report of the State Geologist of California for the year 1862, 118.—Discovery of Childrenite at Hebron in Maine, 122.—On the Height of Mt. Shasta, California; by J. D. WHITNEY: The Human Jaw at Abbeville, 123.—The Geological evidences of the Antiquity of Man, etc.; by Sir CHARLES LYELL, F.R.S., 125.—Ichnographs from the Sandstone of Connecticut River; by JAMES DEANE, M.D., 126.—Notice of some new species of Fossils, from the Niagara group in Indiana, etc.; by Prof. JAMES HALL: Die Ctenodipterinen des Devonischen Systems: von Dr CHRISTIAN HEINRICH PANDER: On the Fossil Remains of a long-tailed Bird from the Lithographic Slate of Solenhofen; by Prof. RICHARD OWEN, F.R.S., 127.

Botany and Zoology.—Botanical Papers in the Transactions of the St. Louis Academy of Science, 128.—The Enumeration of the Species of Plants collected by Dr. C. C. Parry and Messrs. Elihu Hall and J. P. Harbour, in the Rocky Mountains: Paullinia sorbilis and its products, 129.—Aerial rootlets on the stems of Virginia Creeper (Ampelopsis quinquefolia): Martius, Flora Brasiliensis: Dr. Charles Wilkins Short, 130.—The late Wm. Darlington, 132.

Zoology.—Observations on the genus Unio, etc.; by ISAAC LEA, LL.D., 139.—Researches upon the Anatomy and Physiology of Respiration in the Chelonia; by S. WEIR MITCHILL, M.D., and GEORGE R. MOREHOUSE, M.D., 141.

Astronomy and Meteorology.—Discovery of Asteroid (78): Comet II, 1863: Comet III, 1863: Observations of the Zodiacal Light; by STILLMAN MASTERMAN, 143.—Results of Observations of Variable Stars at Weld, Franklin Co., Maine; by STILLMAN MASTERMAN. 144.—Evidence of the cosmical origin of shooting stars derived from the dates of early star-showers, H. A. NEWTON, 145.—The meteoric iron from Newstead, 149.—The meteoric iron from Sarepta, 150.—Meteoric iron from Tucson, Arizona, 152.—Meteor of April 19th seen at Philadelphia, 154.

Scientific Correspondence.—Observations on Stellar Spectra, L. M. RUTHERFURD, 154.

Miscellaneous Scientific Intelligence.—On a system of Mounting Insects for the Microscope; by HENRY T. VICKERS, B.A., 157.—Collection of Minerals and Chemical Apparatus of the late Prof. Manross, 158.—Transactions of the Academy of Sciences at St. Louis: Note on Insecteans: Officers of the American Academy of Arts and Sciences, for 1863, 159.

Book Notice.—Chauvenet's Spherical and Practical Astronomy, 159.

NUMBER CVII.

Page.

ART. XV. On the Velocity of Light and the Sun's Distance; by Prof. JOSEPH LOVERING, - - - - - - - 161

XVI. Further Remarks on a method of Reducing Observations of Temperature; by Prof. J. D. EVERETT, - - - 173

XVII. On the Coal-Measures of Cape Breton, N. B., with a Section; by J. P. LESLEY, - - - - - - - - - 179

XVIII. Hydraulics of the Report of Humphreys and Abbot on the Mississippi River; by Prof. F. A. P. BARNARD, - - 197

XIX. On Inhalation of Nitroglycerine; by JOHN M. MERRICK, Jr., 212

XX. On the Chemical and Mineralogical Relations of Metamorphic Rocks; by T. STERRY HUNT, F.R.S., - - 214

XXI. On the Appalachians and Rocky Mountains as Time-boundaries in Geological History; by JAMES D. DANA, - - 227

XXII. On the Homologies of the Insectean and Crustacean Types; by JAMES D. DANA, - - - - - - - - - 233

XXIII. On the genus Centronella, with remarks on some other genera of Brachiopoda; by E. BILLINGS, - - - - 236

XXIV. On the Explosive Force of Gunpowder; by Professor F. A. P. BARNARD, - - - - - - - - - 241

XXV. On Childrenite from Hebron, Maine; by GEO. J. BRUSH, 257

XXVI. Crystallographic examination of the Hebron mineral, and comparison of it with the Childrenite from Tavistock; by J. P. COOKE, Jr., - - - - - - - - - - 258

XXVII. Meteoric Iron from Dakota Territory—Description and analysis; by CHARLES T. JACKSON, M.D., - - - 259

SCIENTIFIC INTELLIGENCE.

Physics.—On Celestial Dynamics; by Dr. J. R. MAYER, 261: Sources of Heat, 262: On the Measure of the Sun's Heat, 264.—Kirchhoff's Second Memoir on the Spectrum: An Improved Spectroscope—Analysis of the fixed line D; by Professor JOSIAH P. COOKE, Jr., 266.—Spectrum of Phosphorus—Green coloration of hydrogen by phosphorus, CHRISTOFLE and BEILSTEIN: Osmium Spectrum, WILLIAM FRAZER, 267.—

Analytical Chemistry.—On the Behavior of Dextrin and Gum Arabic toward Albumen, RUD. GÜNSBERG: Detection of nitric acid in waters by means of Brucin, KERSTEN: New reaction for Veratrin, TRAPP: Reaction for Molybdenum, BRAUN, 268.—On the quantitative estimation of Arsenic, WITTSTEIN, 269.

Technical Chemistry.—On the manufacture of Soda, Chlorine, and Sulphuric and Chlorhydric Acids; by THOMAS MACFARLANE, 269.

Physiological Chemistry.—On the excretion of Nitrogen in animals, 271.

Metallurgy.—New works: Zusammenstellung der statistischen Ergebnisse des Bergwerks-, Hütton- und Salinen-Betriebes in dem Preussischen Staate, etc., von E. Althans: Handbuch der metallurgischen, von Bruno Kerl, 272.—Etat present de la Métallurgie du Fer en Angleterre, par MM Gruner et Lan: Berg- und Hüttenmännischez Jahrbuch, etc., P. Tunner: Die Fortschritte des metallurgischen Hüttengewerbes im Jahre, Dr. Carl. Fr. Alex. Hartmann: International Exhibition of 1862, 273.

Geology.—Second Annual Report upon the Natural History and Geology of the State of Maine: Ancient Glacial Action in the Southern part of Maine, 274.—Fossil Crustaceans from the Coal Measures and Devonian Rocks of British America; by J. W. Salter; On the Cambrian and Huronian Formations; by J. J. Bigsby: On the Lower Carboniferous Brachiopods of Nova Scotia; by Thomas Davidson: On fossil Estheriæ, and their distribution; by T. Rupert Jones: On a new Labyrinthodont Reptile, from the Lanarkshire Coal field; by T. H. Huxley, 277.—Anniversary Address before the Geological Society of London; by Prof. A. C. Ramsay: On the production of crystalline limestone by heat, 278.—On the Flora of the Devonian Period in Northeastern America; by J. W. Dawson, L.L.D., F.G.S., 279.

Botany and Zoology.—Dimorphism in the Flowers of Linum, 279.—Variation and Mimetic Analogy in Lepidoptera, 235.—Notes on the Loranthaceæ, with a Synopsis of the Genera: by Daniel Oliver, F.L.S., 291.—Parthenogenesis in Plants, etc.: Structure and Fertilization of certain Orchids: Platanthera flava, or Habenaria flava, 292.—Gymnadenia tridentata, 293.

Zoology.—Monograph of the Aye-Aye (*Chiromys Madagascarensis* Cuvier); by Richard Owen, D.C.L., etc., 294.—On the "Minute Vertebrate Lower Jaw," 299.—Note on the Megatherium; by Prof. Agassiz, 300.

Astronomy and Meteorology.—Procession and Pericdicity of the November Star-shower, 300.—Star shower in 1606: Meteorite of Tucson: Observations of the August meteors; by Prof. H. A. Newton, 301.

Miscellaneous Scientific Intelligence.—Electric Illumination at Boston—Photometrical powers of the light; letter from Prof. William B. Rogers, 307.—Vermillion Rock Salt Mine at Petite Anse, Louisiana, 308.—Note on the Rule of Priority: Thirty-third Meeting of the British Association: Personal—Dr. Wolcott Gibbs, 309.

Book Notices.—Heat considered as a mode of Motion, etc.; by John Tyndall, F.R.S., &c., 310.—Brande and Taylor's Chemistry: Supplement to Ure's Dictionary: The American Annual Cyclopedia and Register of Important Events of the year 1862, 311.—Transactions of the Illinois Natural History Society: On the Origin of Species, etc.; by Thomas H. Huxley, F.R.S. etc., 312.

Obituary.—Dr. Samuel Prescott Hildreth, 312.—Joseph Stillman Hubbard, 313.—James Renwick Chilton: Stillman Masterman, 314.

NUMBER CVIII.

Page.

Art. XXVIII. On certain parallel relations between the classes of Vertebrates, and on the bearing of these relations on the question of the distinctive features of the Reptilian Birds; by James D. Dana, - - - - - - - - 315

XXIX. The Classification of Animals based on the principle of Cephalization; by James D. Dana.—No. 1, - - - 321

Page.

XXX. On Vibrating Water-falls; by Prof. ELIAS LOOMIS, - 352

XXXI. On the Rocks of the Quebec Group at Point Lévis,—(in a letter to Mr. JOACHIM BARRANDE of France, from Sir WILLIAM E. LOGAN), - - - - - - - - - 366

XXXII. Chauvenet's Manual of Spherical and Practical Astronomy, 378

XXXIII. Remarks upon the causes producing the different characters of vegetation known as Prairies, Flats, and Barrens in Southern Illinois, with special reference to observations made in Perry and Jackson counties; by HENRY ENGELMANN, 384

XXXIV. On the Earth's Climate in Paleozoic Times; by T. STERRY HUNT, M.A., F.R.S., - - - - - - 396

XXXV. Correspondence of JEROME NICKLÈS.—Obituary: César Mansuète Despretz, 398.—Marcel de Serres: Horace Benedict Alfred Moquin-tandon: Auguste Bravais, 401.—Léon Péan de St. Gilles: Discovery of fossil man, 402.—The manufacture of alcohol by means of illuminating gas, 403.—New method for the concentration of mineral waters, 404.—Manufacture of ice, 405.—Building Materials—Preservation by means of the residuum of coal-tar, 406.—Bibliography, 407.

SCIENTIFIC INTELLIGENCE.

Physics.—On the density of vapors at very high temperatures, DEVILLE and TROOST, 408.—On the work of elastic forces: On the atomic constitution of liquids, WEINER, 409.—On the absorption of gases by charcoal; by Dr. R. ANGUS SMITH, 411.

Chemistry.—On Anilin dyes, HOFMANN: On the constitution of American Petroleum, PELOUZE and CAHOURS: On Cæsium, separation from Rubidium, BUNSEN, 413.—Equivalent of Cæsium: Deliquescence of Cs Cl: Spectrum of Cæsium, 414.—Preliminary notice of a New Metal; by F. REICH and TH. RICHTER, 415.—On some new volatile alkaloids given off during putrefaction; by Dr. CRACE CALVERT, 416.

Photography.—Selenocyanids in Photography; by Mr. EMERSON J. REYNOLDS, 416.—A process for the reduction of silver waste, MILLON and COMMAILLE: Sulphocyanid of ammonia as a fixing agent, by G. W. SIMPSON and Mr. LEWITSKY: Redevelopers BLANCHARD, 417.—Miscellaneous facts, 419.

Agricultural Chemistry.—On the fertilizing action of Gypsum, DEHÉRAIN, 419.

Mineralogy and Geology.—On the phosphatic (or guano) rock from the Island of Sombrero, W. I.; by Dr. T. L. PHIPSON, 423.—Observations on the Sombrero Guano; by A. A. JULIEN, 424.—On the nature of Jade, and on a new mineral species described by Mr. Damour; by T. STERRY HUNT, F.R.S., 426.—Geological Survey of Canada, 423.—Air-breathers of the Coal Period; by J. W. DAWSON, LL.D., 430.

Botany and Zoology.—Origin of Varieties in Plants, 432.—Review of Mémoires et Souvenirs de Augustin Pyramus DeCandolle: On Welwitschia, a new genus of Gnetaceæ; by JOSEPH HOOKER, M.D., F.R.S., etc., 434.—American Tea-plant: The Compass Plant, 439.

Zoology.—Classification of animals based on the principle of Cephalization; by J. D. DANA, 440.—On the Embryology of *Asteracanthion berylinus* Ag., and a species allied to *A. rubens M. T. Asteracanthion pallidus* Ag.; by A. AGASSIZ: List of the Echinoderms sent to different Institutions in exchange for other specimens, with Annotations; by A. AGASSIZ: On synthetic types in Insects; by A. S. PACKARD, Jr.: Beiträge zur Kenntniss der fossillen Pferde und zu einer vergleichenden Odontographie der Hufthiere im Allgemeinen; von Prof. L. RÜTIMEYER: Methods of study in Natural History; by L. AGASSIZ: On the nomenclature of the Foraminifera; by W. K. PARKER and T. R. JONES, 442.

Astronomy and Meteorology.—Discovery of a new Planet, Asteroid (79), in a letter from Prof. JAMES C. WATSON, 443.—Observations in Brussels of the meteors of August, 1863; by Mr. QUETELET: Observations by Mr. ALEX. S. HERSCHEL of the August Meteors, in England: Observations on the August Meteors, by Dr. E. HEIS, at Münster, 444.—Die Grosse Feuerkugel welche am Abende des 4 Mars, 1863, in Holland, Deutschland, Belgien und England geschen worden ist, von Dr. EDUARD HEIS: Die Meteoriten, ihre Geschichte, mineralogische und chemische Beschaffenheit, von Dr. OTTO BUCHNER, 445.—Shooting Stars of November, 446.

Miscellaneous Scientific Intelligence.—New Achromatic Object-glass, 446.

Book Notices.—Storer's Dictionary of the Solubilities of Chemical Substances: Practical Treatise on Limes, Hydraulic Cements and Mortars, etc.; by General QUINCY A. GILMORE, A.M., 447.

Obituary.—Stillman Masterman, 448.—Major Edward B. Hunt, 450.—Professor Eilhard Mitscherlich, 451.

Proceedings of Societies, 451, 452.

Index, 453.

ERRATA.

Vol. XXXIV, p. 136, line 23 from top, for ROMINGA, read ROMINGER.—Vol. XXXV, in Index, p. 470, insert *W. C. Minor* on fission in Annelids, 35.

P. 243, l. 5 from bottom, for *Schiesspulver* read *Schiesspulvers*.—P. 198, line 10 from top, for P, read *p*.—P. 205, l. 6 from top, for formula, read column.—P. 209, l. 13 from top, for $s_{,,}-s_{,}=\frac{1}{2}P(e+x)^2x$, read $s_{,,}-s_{,}=\frac{1}{2P}(e+x)^2x$.—P. 210, l. 9 from top, for formed, read obtained.—P. 378, l. 19 from bottom, for "does not treat the," read "does not treat *of* the."—P. 382, l. 17 from top, for "the time," read "for the *first* time."—P. 407, line 30 from top, for *depruis* read *depuis*.—P. 408, lines 11 and 15 from top, for Flamen, read Flamm.
